WORLD HAPPENINGS
BRIEFLY TOLD

Dr. J. R. Hayes, personal physician to Abraham Lincoln, died at Washington, at the age of 95. He had wanted to live to be 100.

Major Charles William Orr, colonial secretary at Gibraltar, has been appointed Governor and Commander-in-Chief in the Bahamas.

Dr. Frans Exner, famous as a physicist, died in Vienna recently. He was noted for his calculations of the size of molecules and other achievements.

Formosa's 120,000 head hunters have not caused the Rev. Thomas Barclay to lose any sleep in all his 52 years as a missionary on the island, and he has gone back to his work after six months leave in England.

Canada's total area estimated as shown to fall short up to October 31 last for the season, 1927, excluding British Columbia, is 897,900 acres, as compared with 992,600 acres, the area shown in 1925 for 1926.

Reckless automobile driving cost the lives of 70 persons in Canada in October and injuries to 50 others. Forty crossing accidents were reported, in 31 of which automobiles were involved.

The eighth Canadian egg laying contest is being conducted at the experimental farm, Ottawa. The contest is made up of eight pens. The entries again cover a very wide area, the West being represented as follows: British Columbia, 11 pens; Alberta, 2 pens.

The Arab tribesman who shot and killed A. G. Elliott, mechanic for the British aviator, Alan J. Cobham, last July, while making his London-Australia flight, has been found guilty of manslaughter. He was sentenced to five years "rigorous imprisonment."

The annual provincial seed fair, under the auspices of the provincial department of agriculture and Alberta Seed Growers' association, will be held this season in Edmonton on January 18, 19, 20 and 21. The annual convention of the Provincial Seed Growers' association will be held at the same time.

Shetland Islands Treeless

But Every Gale Washes Timber and Driftwood Ashore

The Shetland Isles face the Atlantic storms, which beat on them so fiercely that not a tree lifts its head on the islands. But what the ocean takes away with one hand it brings in the other, for with every gale it throws ashore timber and driftwood.

Some of the timber could tell a story, and many a drifting log or bough has a long sea yarn behind it. The first fires that were lit on Shetland when the Stone Circle builders lived there were made of logs and driftwood that perhaps had been carried by the current of the Gulf Stream all the way from Florida and the Gulf of Mexico.

Last year a passenger on a steamer off Palm Beach, in Florida, dropped a bottle in the sea containing a letter. He thought the bottle would surely be washed ashore somewhere in the United States, but no; the wilful sea bore it far away from the New World, and deposited it on the shores of Shetland, where it has lately been picked up.

British Nation's Income

Estimated Average is Over One Pound Per Week for Each Person

The estimated income of Great Britain, say the Inland Revenue Commissioners, is now 2,900 million pounds, over £1 a week for every inhabitant.

Of this amount the Inland Revenue took 510 millions in income tax, super tax, and death duties. Super tax was paid on incomes over £2,000 by 87,000 people, and 121 of them had incomes of £100,000.

Death duties were paid on 106,000 estates; but 26,000 of these were £300 or less. One estate was over three million pounds, and there were 12 between one and two millions.

Bacon Type Hogs

Increased production of bacon type hogs and widespread interest taken in this branch of agriculture in the three prairie provinces are credited largely by representatives of stock yards and packers organizations in Regina to the annual competitions held for the boys' and girls' clubs by the Agricultural Department of the Canadian Pacific Railway.

Manitoba Hemp Acreage

Approximately 700 acres were sown to hemp in Manitoba in 1926, largely as a result of the activities of the Manitoba Ciderage Company. The largest acreage is in the Portage la Prairie district but a hundred acres have been grown at Norris and smaller areas at Grand-bois, Roland, Elm Creek, Carleton Place, Langruth and Oak Point.

Who is the woman who knows how to make a bun but who at the same time who knows how to manage without one?

It is easy for a woman to do poor. All he has to do is acquire the famous habit.

A blockhead is a man who is unable to fit his opinions to your channel.

Valor Of Mounted Police

Famous Achievements of the Early Days Are Again Recounted

A special despatch to The Globe on Friday last from Calgary recorded the retirement from service in the city of "Punch" Davis, who for many years was a member of the Royal North West Mounted Police, who in the '80's of last century was the hero of many thrilling events as a member of that notable force, and who won the popular title of "the bravest man in the Mounted." Among Davis' famous achievements was that of conducting a band of Sioux Indians who had claimed the protection of the British flag, from the United States boundary to a reservation set apart for them in Saskatchewan. This he did alone and unarmed, shepherding them from Fort Walsh, on the border of Montana. The Indians, numbering 1,100, had been guided to the frontier by a large force of United States cavalry, and the astonishment of the American escort may be imagined when Davis alone appeared to take over charge of the fighting redskins. It was not long after the Custer Massacre and the exciting occurrences attending the desolating conflict between the Indians and the United States troops. But the Indians knew the members of the Canadian Mounted Police as the Mounted Police knew them. They knew them for their integrity, their courage, and their loyalty to their word, and the mutual confidence that existed was demonstrated by the journey to the Saskatchewan reservation, which was without mishap.

The Royal North West Mounted Police, now the Royal Canadian Mounted Police, has had no rival in any similar force in the world for its achievement in giving security during many years to a great frontier territory and maintaining peace and order among its inhabitants. — Toronto Globe.

Editor Is a Poet

Man in Webster, S.D., Writes Headings in Rhyme

There is an editor in Webster, South Dakota, who has conformed with the muse. Will A. Wells of the Journal writes his headings in rhyme.

For all ordinary stories, Mr. Wells uses a rhyming head of three decks—a single cross-line, followed by two pyramided banks. Where a head in verse is not appropriate, Editor Wells resorts to a prose caption which flows in continuous thought.

When the owner of an illicitly operated still was arrested, the Journal said: "A great big still and a hot gin mill, we found the other day—Sam and Sol made quite a haul, and put the man away." At the beginning of school: "The class of 1933, a bonny bunch of kiddies—They start to school, which is the rule; you ought to see their faces shine!"

Overlooked Historic Guns

Thieves Looting Danish Palace Left Gifts of Lincoln

Three pistols presented by Abraham Lincoln to King Frederick VII. were overlooked by thieves who broke into the Jagerspris castle museum here and made off with a lot of valuables. The pistols were a gift in appreciation of the king's grant to the Danes of a free constitution. The king at the time received presents from nearly all world rulers. Most other gifts on the occasion were tobacco and pipes, the king being an inveterate pipe smoker.

British Columbia Tobacco

A tobacco growers' association has been organized at Kelowna, B.C., to look after the interests of the producers who have taken up this branch of agriculture. Splendid reports have been received as regards this year's leaf and there is every indication that next year's acreage devoted to the nicotine weed will be much larger than this year's plantings. This applies not only to the Kelowna district but also to that of Oliver and Cawston, which have followed Kelowna's lead.

Fur Farming in B.C.

Fur farming is "catching on" in the Creston, B.C. district. Several farmers and fruit growers have set up breeding pens of muskrat, black fox and black coon. One farmer plans to add marten, mink and fisher this winter. Black coon breeding here goes back three years when Fred Smith started with a pair that have now increased to twenty. "They thrive well on a diet of old house meat," he says.

Canadian Cattle for New Zealand

Three fine specimens of pure-bred Jersey cattle have been shipped to New Zealand. An Auckland breeder had loaned of the splendid Jersey herds of the Fraser Valley and ordered three of the animals to improve his stock. During the year British Columbia cattle have been sent to many parts of the world via the Pacific.

There are books in the British Museum described on oyster shells, bricks, tiles, bones, ivory, lead, iron, copper, sheepskin, wood and palm leaves.

Men buried in snow can hear every word uttered by persons on the outside, but their own loud shouts are inaudible.

There is enough salt in the ocean to make a cover a mile and a half thick for the United States.

Were Stupid As Boys

Many Great Men Were Not Brilliant at School

Because a boy may be adjudged stupid at school, it does not follow that he may not become a successful man.

"You care for nothing but rat-catching, dogs, and shooting, and you will be a disgrace to yourself and your family," Mr. Darwin chastised his son, Charles, with these words, and there seems little doubt that the boy merited the rebuke. Yet years afterwards the name of Charles Darwin was world-famous.

"A stupid, heavy blockhead," Oliver Goldsmith's old schoolmaster, who looked upon the famous writer as one of the biggest dunces he had ever had to teach, thus denounced his pupil. Yet Goldsmith wrote the poem "The Deserted Village"; the novel "The Vicar of Wakefield"; and the comedy "She Stoops to Conquer," and his name will be revered wherever English literature is found.

Edison, the electrical wizard was sent home from school by his teacher, who asked the lad's mother to keep him away as his brains were "addled."

Mothers need never despair if their sons and daughters do not show great brilliance at school. The men and women who have made names for themselves in business, art, science, and even politics, were amongst the steady scholars, whose hard work and persistent application gained for them ultimate success. The mushroom genius, flashing brilliantly through school and college, rarely gains a great place in the world of men and affairs.

Chicago's Crime Record

More Murders in First Ten Months of This Year Than Whole of 1925

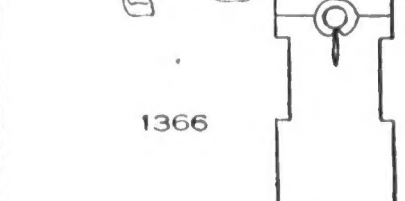

Thirteen more murders and 52 more cases of manslaughter have occurred in Chicago during the first ten months of 1926 than for a corresponding period last year, according to a crime report made public today.

A total of 136 murders have been recorded against 123 for the corresponding period in 1925, while manslaughter cases have increased from 112 to 164, the report states.

Traffic violations, the same report shows, have jumped from 59,412 to 109,997, while robberies dropped from 2,330 to 2,191, and liquor violations from 6,119 to 5,250.

IDEAL Fashions
by
Fairbanks-Hamilton

1366

A Simple and Practical Girls' Dress

If you are thinking of making a new little frock for your young daughter, you will find this smart design very simple to fashion. The dress has the popular kimono shoulders, and long sleeves gathered to narrow wrist bands. The neck has a front opening and is finished with a neat round collar. An inverted plaid at each side of the skirt gives added width, and a belt and patch pocket complete this trim little dress. No 1366 is in sizes 6, 8, 10, 12 and 14 years. Size 8 years requires 2 1/2 yards 36 inch, or 1 1/2 yards 54 inch material. 20 cents.

Our new Fashion Book contains many styles showing how to dress boys and girls. Simplicity is the rule for well-dressed children. Clothes of character and individuality for the junior folks are hard to buy, but easy to make with our patterns. A small amount of money spent on good materials, cut on simple lines, will give children the pleasure of wearing adorable things. Price of the book 10 cents the copy.

The furthest of Saint Peter and Paul in Leningrad, long famous as a prison, is to be converted into an historical museum.

Micmac Guide Noted for Moose Calling

SAM GLODE, MICMAC GUIDE.

When a hunting expedition headed by James W. Stuber, sportsman-editor of Columbus, Ohio, in the interests of the Ohio State Museum, set off into the wilds of Nova Scotia recently, Sam Glode, famous Micmac Indian guide, was engaged by the party to bring his noted moose-calling abilities into play.

Few guides are wiser to the habits of big game than Glode, and as the hunters lay in ambush they listened to the answer of a bull-moose nearly a mile away. Call after call sounded from Glode's birch bark horn and each time the bull's answer came; and the nearer. The hunters waited in suspense till the moose crashed through into a clearing and advanced to within twenty-six yards of the guide. Wonderful feats of Moose calling have been accomplished but according to guides and seasoned hunters in the vicinity where the moose was killed, the feat of calling moose to within a distance of twenty-six yards has never been duplicated. In reporting the results of their hunt at the tourist department of the Canadian Pacific Railway in Montreal, Mr. Stuber stated that his specimen for the museum was one of the finest that could be obtained.

Wheat Pools Sell Most

Over Fifty-two Per Cent of Crop Handled by Pool

The Canadian Co-operative Wheat Producers Ltd., the Central Selling Agency of the Alberta, Saskatchewan and Manitoba Wheat Pools handled in the crop year ending August 31st, 1926, 187,200,000 bushels of wheat out of a total of 357,559,637 bushels actually delivered to all agencies, private and co-operative. This handling by the Pools is over 52 per cent of the total deliveries.

On the basis of No. 1 Northern Wheat at Fort William, Ontario, initial, two interim, and final payments were made amounting to \$1.45 per bushel. From this, deductions were made, for freight to Fort William from the shipping point, elevator charges, elevator reserve, commercial reserve and operating expenses. The net price, therefore, depended on the freight charges, the grade, and how the wheat was delivered; elevator reserve, commercial reserve and operating expenses being the same per bushel for all.

Balmoral Castle Improved

Made More Comfortable Than in Queen Victoria's Time

Balmoral Castle has changed a good deal since the Victorian era. It is now by no means the comfortable place it was when King Edward vowed that "one could catch a different kind of cold in every room." Edwardian improvements were many, and in recent times Queen Mary's able mind has dealt with the Castle's problems, and both the Royal family and the staff are said to be as comfortable in Balmoral as in any of the Royal residences. The reason why the Prince of Wales seldom visits Balmoral is said to be due to the fact that neither fishing nor shooting makes a strong appeal to him.

Alberta Fisheries

The summer fish catch on Lesser Slave Lake was good, according to R. T. Rodd, Dominion Fisheries Inspector at Edmonton, who states that more than 600,000 lbs. of whitefish were taken out of the lake with 468, 711 lbs. of pickerel, 310,162 lbs. of pike and smaller quantities of other fish.

A Scotsman invited to a golden wedding, was told that each guest would be expected to take a golden present. He took a goldfish—London Times.

Violet-scented seaweed in the lakes of the Manichish peninsula in the Caspian Sea perfumes the air for miles.

Even a charitable puglist is sure to be close listed.

Banks compete but they never give away samples.

Opening Of Dunblane Bridge

Importance of This Structure to Western Canada Is Stressed by Speakers

The Moose Jaw board of trade was host to the boards of trade of Regina and Saskatoon, the lieutenant-governor and members of the provincial government and Sir Henry and Lady Thornton and officials of the Canadian National at a banquet to celebrate the opening of the Canadian National and provincial government highway bridge over the South Saskatchewan river. There were seven hundred guests.

The boards of trade of the three cities were conveyed by the Canadian National to the bridge during the day and following a shanty luncheon at the bridge, Sir Henry Thornton and Premier, J. G. Gardiner officiated at the opening ceremonies.

The Dunblane bridge crosses the South Saskatchewan river at the elbow of the river ninety miles north of Moose Jaw, connecting Central Butte on the Riverbank branch of the Canadian National railway with Dunblane on the Conquest division of the railway. The bridge is 1,771 feet long and underneath the railway tracks the highway structure is suspended. It provides a short route from the Alberta coal fields to Southern Saskatchewan and Manitoba.

Speakers on the evening's programme included Premier Gardiner and Sir Henry Thornton, both of whom stressed the importance of the bridge not alone from the local standpoint, but from the broader viewpoint of the whole of Canada. They impressed upon their hearers the necessity for the people of western Canada to think nationally.

Sir Henry spoke with optimism of the future of Canada and particularly stressed the importance of the people of the west studying the problems of those in the east and contributing their share of the work to make confederation even a greater success than it has been.

Galleys Were Floating Palaces

Repeated Efforts Made to Salvage Roman Emperor's Houseboats

Nineteen hundred years ago, on the banks of Lake Nemi, a picturesque little lake in the Alban hills near Rome, stood the famous sanctuary and grove of Diana. It was to this pleasant refuge and to his magnificent floating galleys anchored there that the Roman Emperor Caligula repaired for an occasional respite from his life of crime in Rome. These houseboats were beautiful beyond our dreams, inlaid with marble, ornamented with precious metals and scented woods, and adorned with statuary; the sails were of the finest linen and the hangings were embroidered with silver and gold. Now, these rich old galleys lie at the bottom of the lake, where their outlines can be faintly seen on clear, still days. Repeated efforts, which date back as far as the fifteenth century, have been made to raise them, but all have been futile. In 1895 divers brought to the surface wooden fragments, magnificent bronze ornaments, curious relics and information concerning the structure of these vessels. The most recent suggestion for their recovery has been to drain the lake for a temporary period by means of a tunnel or tube. The reclamation of these galleys would, it is said, bring to light a marvel of naval construction and the highest expressions of luxury.

Expecting Something Better

Distinguished French Premier Did Not Satisfy Small Girl

One of the best stories concerning M. Briand, the distinguished French statesman, is associated with an incident that occurred recently at a social gathering in Paris which he attended. M. Briand, it is generally admitted, does not greatly shine on these occasions. He usually sits silent and hunched up, seemingly in thought, and frequently not speaking unless directly addressed. Amongst the guests on this particular occasion was a little girl who, after eyeing him covertly for some time, at length approached him and said, "And you are, really and truly, the Prime Minister of France?" "Yes," answered M. Briand pleasantly, "really and truly." "I have often thought I would like to see a Prime Minister," she went on, "and—now, at last, you're satisfied." "Interrupted the Premier laughingly. "No," replied the little girl. "I'm not I'm disappointed."

Presents Pointing to Coolidge

Expression of ever-growing friendship between the United States and Australia were heard at the White House recently when Sir Hugh Denison, new Australian commissioner to the United States, presented President Coolidge with an oil painting depicting the visit of the United States battle fleet to Sydney in July, 1925. The painting is a gift of the citizens of New South Wales, and is the work of Charles Bryant, Australian marine artist.

More Land Cultivated

A record acreage has been brought under the plow this year in Alberta, according to a statement from the Department of Agriculture. In one district more land was broken than in the five preceding years combined. Good prices for wheat are mainly responsible for this as well as an increasing number of new settlers.

Confidence is seldom lost, but it is often sadly misplaced.

Cheap Rates For Immigrants

Hon. Robt. Forke Negotiating for Renewal Agreement With Transportation Companies

Hon. Robert Forke, minister of immigration has announced that negotiations are now far advanced toward the renewal of the agreement whereby ocean and land transportation rates for immigrants were almost cut to one-third of the previous level.

The agreement was entered into by the British and Canadian governments and the ocean and land transportation companies. The effect of the agreement was to reduce the ocean fare from more than \$90 to \$15, and the railway fare from point of disembarkation to Winnipeg from more than \$75 to less than \$25. There were similarly sweeping reductions in the fares to all Canadian cities.

Without such an agreement it is clear that immigration would fall away to the vanishing point. The present agreement expires soon.

Mr. Forke stated that he had lost no time in taking up the problem of renewing this agreement. Negotiations were entered into some time ago with ocean and rail transportation companies as well as the British government. He felt certain that a renewal of the agreement would be agreed to and that the renewed agreement would run for two years or until January, 1929.

Some difficulty is being experienced with ocean shipping owners, who desire to obtain easier access to the Dominion for immigrants in return for the reduction in rates. The ship owners declared that the increase in traffic had not warranted the reductions. Mr. Forke intimated that he did not intend to consent to any weakening of the barriers now raised against undesirable immigration.

Canadian Apples

Apple Orchards of the Dominion Are Valued at \$120,000,000

The value of apple orchards in Canada today is \$120,000,000; and production has increased in the past fifteen years from \$13,000,000 to \$27,000,000 annually, according to G. E. McIntosh, Dominion Fruit Commissioner. "And yet," the Commissioner points out, "since 1910 there has been a reduction of 99,000 acres devoted to apples. There is no over-production of fruit in Canada but there is under-consumption, despite the supremacy of the Canadian apple."

All the fruit-growing provinces of Canada were represented in the high awards for apple exhibits at the Imperial Fruit Show held in London, England. The British Columbia McIntosh Red was awarded the premier prize as the best dessert apple in the British Empire while the best cooking apple also came from the same province. High awards in various classes went to Ontario, Quebec and Nova Scotia.

Migration And The Dole

State Aid Giving is Affecting Welfare of the Empire

The young man asks himself why he should go to New Zealand, or Manitoba, or New South Wales, where he will have to work hard, when he can draw a pleasant and comfortable weekly allowance in England without any work at all. This is only human nature. Our vast expenditure on State aid-giving is thus directly affecting the welfare of the Empire and risking the position and future of our race in the world. For if British settlers cannot be found settlers from other countries will take their place.—London Daily Mail.

Won The Wager

His climbing abilities laughed at by a group of young Alpinists, an eighty-four-year-old Alpine guide, of Innsbruck challenged them to a race up and down the Zugspitze mountain, 9,000 feet high, for a wager of a dinner. Nine young climbers accepted the challenge and reached the summit slightly ahead of the veteran, but during the descent he passed all other competitors, and arrived at Innsbruck half an hour before the next man.

Canada Leads as Wheat Exporter

The Federal Bureau of Statistics reports that for the 1925-6 season Canada led the world as an exporter of wheat and flour. Canada led in wheat exports by nearly 150,000,000 bushels, the Argentine coming second in flour shipments the Dominion came first with 8,000,000 barrels and the United States second with 7,450,000 barrels.

Winnipeg Building Permits

Building permits for the year to date in Winnipeg city more than double those of the same period last year, at \$10,000,000 as compared with \$4,166,690 for the whole of 1925.

A tame elephant eats more than one thousand pounds of green fodder and twenty-five pounds of unhusked rice daily.

A new air rifle capable of shooting 2,200 yards and piercing a steel plate three-twentieths of an inch thick has been invented.

Many a seemingly successful man owes it all to his wife's father.

Apples grown in Canada this year would fill nearly 3,000,000 barrels.

Wonder what Eve fussed about before Adam learned to smoke.

The Drift To The Towns

By C. W. Peterson

We cannot escape the conclusion that the drift from farm to city is the direct cause of a subsequent drift from Canada to the United States. Also that the former cannot be regarded as a mere accident, but has a substantial social and economic foundation. Whether or not the causes can be wholly eliminated is a question which might possibly have to be answered in the negative, because they are to a very large degree of world-wide occurrence. That this exodus from farm to city in Canada could be severely checked is, however, a fact which cannot be successfully refuted.

Our gross agricultural plant last year was worth 7 1/2 billion dollars with a production of 1,718 million, which represents solid, new wealth. If we take this total agricultural production and deduct the cash outlay of Canadian farmers for hired labor, seed and fertilizer, amounting to 385 million dollars, and allow 6 per cent on capital invested in agriculture, or 450 million dollars, we get a net average return to the individual farmer operator of \$870 for his year's work, which must be shared by his wife and children, if any, who did productive, unpaid work on the farm. Applying it all on account of the farmer's own wages however, on a ten-hour day basis, we get an hour rate of 29 cents. Compared with factory workers at 56.1 cents per hour; railroad workers, 58.3 cents per hour; miners, 83.4 cents per hour, and workers in building trades, \$1.06 per hour, it does not look particularly inviting, even conceding that the farmer lives root free. We have apparently here ample explanation of the drift to the cities of our young Canadian farm population.

Mr. Otto H. Kahn, the famous American multi-millionaire banker, dealing with the agricultural situation in the United States, recently made the following trenchant observations:

"If there is one calling which has a higher claim than another upon the helpful consideration of the State it is that of the farmer. The farmer's problem is part of our problem. The farmer's welfare is an essential part of our welfare."

"It is harmful and menacing to the commonwealth that so numerous and so valuable a portion of the population should feel dissatisfied and resentful and be without prosperity. The situation lends itself peculiarly to the incitements and wiles of the demagogue and to the plausible figments of the economic visionary."

"Both justice and self-interest demand of the community at large that, every legitimate endeavor be put forth to the end that the farmer's grievances be redressed. If that redress can only be accomplished by methods which, while practicable and economically warrantable and promising to be effective, are novel and perhaps unpalatable to the established ways of business, then the less important will have to yield to the more important, i.e., business convenience and customs to the rehabilitation of the farming industry."

"It is not sufficient answer to the farmer's complaint to refer him sternly to the rigid functioning of the law of supply and demand and to the doctrine of the survival of the fittest; because in reply the farmer will contend that, in other respects, for reasons which seemed valid to Congress, we have not scrupled to interfere, through acts of governments and otherwise, with the untrammeled workings of that law and that doctrine. And he will and does claim that we either adhere to them strictly, all round or give him the effective advantage of dispensations similar to those which have been granted in the case of other callings."

Mr. Khan has a reputation for sound, constructive thinking, and his views might well be seriously considered by all classes of Canadians. Coupled with a vigorous immigration policy, we must develop a new interest in the problem of increased agricultural development.

New Advertising Stunt

Cardy Company Dropped Chocolate Bombs Over Berlin From Airplane

Chocolate bombs dropped from airplanes as an advertising stunt by a Berlin candy company have bruised so many pedestrians that the police have halted the sweet bombardment. The company had been sending up two planes on Sundays. Every park, beer garden or street in which the fliers chanced to spot a crowd was bombarded with hard chocolates, wrapped in heavy foil, from an altitude of about 100 feet.

Aggressive Colonization Policy

An aggressive colonization policy to effect the arable lands of Alberta has been launched under the leadership of Hon. Herbert Greenfield, former U.F.A. Premier of the Province. The leader's work will take him to London after his preliminary survey of conditions in Alberta; and while there he will cooperate with Federal and railway company immigration authorities.

A man isn't necessarily bashful because he declines to meet his obligations.

The worst fault of some people is telling other people theirs.

Love is the real thing until the new dress begins to wear off.

His Christmas Gift

Ever so many things you can get the man or "boy" for Christmas, but—the Gift that pleases him best of all is one that is practical.

Articles of wearing apparel such as Shirts, Ties, Gloves, Hosiery and other Furnishings will surely delight him and remind him of your thoughtfulness and the interest you take in his personal appearance.

It makes little difference what his age may be—there is something here in this store he would be elated in receiving and proud to wear.

A "Wearable Gift" is a practical Gift! And to either man or "boy" it's the Gift that pleases most! There is no doubt about it. It's something that "strikes home" with his personal preference—for, any item that enriches his personal appearance or adds to his comfort, tends to increase his pride. And doing that, it's a Gift most acceptable.

So if you want to see him radiate true Happiness this Christmas—just watch him when he unties the Gift boxes addressed to him and containing articles selected from the attractive assortment at this store!

BIBLE CHAUTAUGUA TO OPEN

The Bible and Music departments of the Canadian Junior College will give a series of music and lecture program in the Elk's Lodge Hall, beginning Sunday afternoon, Dec. 5th at 3 o'clock.

Mr. Dudley Newbold, Bible instructor of the college will give a lecture at the first meeting of the series on the subject "Recent Excavations As Proof of Bible Inspiration."

Mr. D. E. Edwards, instructor in the music department will conduct a song service for the congregation and direct the singing of the College choir, and also play some violin solos. The public is cordially invited to attend these meetings.

CLIVE

About eighty members and friends of the Olive Baptist Church gathered in the basement of their new building on Friday evening last. A sumptuous

chicken supper was provided by ladies for this happy church family, who came to bring them thanksgiving gifts to their Bountiful Provider. A programme of hymn singing and recitations was thoroughly enjoyed, after which the Pastor gave an address on "The Church of the Open Door." Five hundred dollars in gifts was brought in. There are services in the Olive Church every Sunday from 2 to 4 o'clock. You are welcome.

O. BOODE AND SONS

Now is the time to buy that violin outfit. Violins, bows and cases at O. Boode and Sons for less than Wholesale.

McDermid Drug Co., Limited

Unfair Competition

Efforts have been made by the authorities to make peddlers pay a certain fee into the treasury before they are permitted to vend their wares in competition with businessmen who have established businesses and invest their money in our towns and villages. While the license fee is not high enough, it acts as a deterrent in many cases, and organizations who do their business through peddlers have struck on another scheme by which they hope to vend their goods free of charge, with the help of unsuspecting citizens. The last scheme, and one which is making fair headway in Lacombe is the "endless chain stocking club." By this scheme a lady who buys a pair of stockings gets in return three coupons with her purchase, which she is supposed to palm off on her friends. When the friends send in their orders for a pair of stockings each, and send the cash, the lady who has undertaken to peddle the stockings gets a pair free of charge. And each of the ladies who receives the coupons and who sends in her order with the money, gets three more coupons which she must peddle before she gets a pair of stockings free. And so on, ad infinitum. This scheme is a fairly clever one for the parties who have started it, but is operated for the sole purpose of beating the license. They are getting rid of stockings worth about 65c. for just twice that money, and can well afford to give a pair free with every three orders. And just think what a pull they have, with probably a couple of dozen ladies in every town boosting their wares for the sake of a free pair of stockings. Do the people of Lacombe think this is fair competition for our businessmen? The peddlers in this case pay no fee, they help in no way to pay the expenses of the municipality. Every pair of stockings peddled in town is just so much money taken from its legitimate channel—the Lacombe business houses—the people who pay the bulk of the taxes of the town and provide the money for the operation of our schools, churches and other public utilities. And the goods being peddled are being sold for far more than their worth, or it would not be possible for the operators to give a pair of stockings for every three pairs sold. You get very little for nothing in this world, and the parties who patronize this scheme can rest assured that they are paying a long price for all the pairs of stockings they buy, as well as paying for the free stockings obtained by the other members of the chain.

The stores of Lacombe try to give the citizens good service. They pay the bulk of the taxes. Sixty or sixty five of the largest taxpayers in Lacombe are either in business or deriving their salaries from the various businesses. The less business done in Lacombe the less money there will be for the needs of the municipality. Businessmen will be compelled to cut down their staffs, clerks will be thrown out of employment, our schools will have to be curtailed, if peddling is allowed to make headway. The stocking club scheme may, only be a small thing, but if our citizens patronize it it is only a matter of time until other peddling schemes are launched.

If you would see the town prosper, spend your money in Lacombe. Money sent away does not help Lacombe. But if you are determined to patronize the peddlers, at least be fair enough to see that the said peddlers have taken out a license.

And remember, schemes such as the above are not legitimate. Thousands of schemes of a like nature have started, flourished while the victims are enthusiastic, and then collapsed. Every time one has collapsed someone has lost a lot of money. When this stocking scheme collapses, as it surely will, there are going to be thousands of persons holding coupons which will never be redeemed. The parties who have worked hard to get the free stockings will be left "holding the bag."

We say once more—spend your money in the town where you make your living, and help make Lacombe a "real" place to live in.

erless Church makes a powerless Pulpit." NOTE—Communion Service next Sunday.

BAND CONCERT

The Sunday night sacred concert which was held in the Elk's Hall last Sunday was one of the best musical programmes that has been presented to the music lovers of the district since the Elk's Concerts first started. The Elk's Band was at its best with their new musical instruments, which they used for the first time and bandmaster Dunphy and his musical artists received lots of compliments for the splendid programme given the big crowd present.

Professor D. R. Edwards, late of Washington, D.C. who is now in charge of the Musical Department of the Canada Junior College received a big ovation with his high class musical numbers on the violin and was encoored repeatedly. He was accompanied by Mrs. O. W. Reimnuth on the piano. Miss Brenna Reed sang two solos, accompanied by her mother, Mrs. F. H. Reed and was enthusiastically received. Rev. I. H. Eberle was chairman and the Elk's Hall had a capacity crowd and was treated to a real musical programme by high class artists.

RED ROSE "is good COFFEE"

World Benefactors

In one of his famous satires, Dean Swift makes the king of Brobdingnag give utterance to the opinion that whoever could make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before, would deserve better of mankind and do more essential service to his country than the whole race of politicians put together.

Certain it is that while many politicians have done an immense amount of good in this world, many others have done incalculable harm, but the experimenters and scientists who have carried out the dictum of Dean Swift's imaginary king have conferred nothing but good upon mankind.

In April last the death occurred of Luther Burbank, of California, popularly known as the plant wizard, at the ripe old age of 77 years. Mr. Burbank devoted his life to the breeding of plants, and the results of his remarkable experiments in the development of flowers, fruits and plants of all kinds are too well known to require more telling. He gave added size and beauty to flowers and developed many new types; he increased the size and flavor of many fruits; he increased the productive power of many plants and trees many times over. He thus added not only to the beauty of the world, but to the fruit grower, the wealth of the world, and the health of people generally.

Canada, too, has its plant wizard in the person of Dr. Saunders, the creator of Marquis wheat. About twenty-five years ago Dr. Saunders, after long and painstaking experiments, succeeded in crossing a kernel of wheat from the shores of the Baltic with another kernel of wheat from the foothills of the Himalayas and thereby created a new type which produced a larger yield per acre, made a whiter flour, and ripened in less time and thus avoided damage from frost. This new wheat was named Marquis, and from the one kernel of only about twenty-five years ago, there is now harvested around four hundred million bushels annually. Dr. Saunders' work has meant hundreds of millions of dollars to Canada within the life of the present generation.

Western Canada can also boast of its experimenters through whose efforts several blades of grass, or wheat, have been made to grow where only one grew before. The name of Seager Wheeler is a household word in the farm homes of this country. He has shown how the finest wheat in the world, the wheat which year after year captured the world's first prize, can be grown. He has demonstrated the methods to be followed, and has proven how profitable good farming and proper cultivation and seed selection is as compared with careless and indifferent cultivation, the use of poor seed and poor farming in general. Seager Wheeler is now engaged in demonstrating that apples, pears, plums and other fruits can be successfully grown on the prairies of Western Canada.

Politicians have a work of importance to do for the country, and in the doing of it honestly, faithfully, and well they are deserving of all honor and loyal support, but men like Burbank, Saunders, Wheeler, and others whose names are not so well known but who are quietly raising the standard of production, are likewise deserving of all the honor their fellow citizens can bestow upon them. They are doing a work for mankind which neither politicians, nor any other group of men can do, and their works will live after them.

The world heaps honors and riches on the successful politician, manufacturer, financier, and business man. Too frequently, though, the quiet man at work in his garden, field or laboratory, working out through years of study and experimentation difficult problems whose solution blesses all mankind, remains unrecognized and without reward. It is gratifying, therefore, to learn that a body has been created with strong financial backing to carry on the work to which Luther Burbank devoted the best years of his life; that the Dominion Government has recognized Dr. Saunders' invaluable research work by granting him an annuity of some thousands of dollars for life; that leaders in all walks and professions in life have united in doing honor to Seager Wheeler.

Over and above the material achievements of these really great men, and the direct benefits they have conferred on the world, there is the example of such lives and the incentive they give to others to strive mightily for greater, better things. The individual farmer who is earnestly striving to make his farm a model for the community in which he lives, who wages unceasing warfare on weeds, who gives close attention to the cultivation of his soil, insists on good, clean seed, who eliminates scrubs from his herds and houses his cattle in clean and sanitary buildings, or the farm wife who takes a pride in her poultry, in the quality of the milk and cream sent to the creamery, or the butter she herself may make, are likewise doing essential service to their country and are deserving of the thanks of their fellow citizens.

Wonder Of Modern Surgery

Blood Transfusion Possible Without Attendance Of Giver

London doctors have discovered that transfusion of blood can be made without the attendance of the giver of the blood alongside the patient receiving it. A pint and a half of blood taken from a person in Paddington was raced through London to a patient at Richmond in Surrey and successfully transfused.

This wonder of modern surgery was done with the aid of a motor car and a new medical invention enabling the blood to be kept in perfect condition and at the necessary temperature during the journey.

Queen Mary has never been up in an airplane, and what's more, says her majesty, "I'm not going." The king has never flown, either, but both are fond of attending air meets as spectators.

The superstition that breaking a mirror brings bad luck dates from the time when ancients consulted mirrors. These, if broken, could give no replies.

The Straits of Babel-Mandeb, connecting the Red Sea with the Gulf of Aden, is called the Gate of Tears because shipwrecks are so frequent there.

Has Largest Number Of Horses

Saskatchewan Is Still Maintaining Lead In Dominion

In the annual report of the Saskatchewan Live Stock Branch, J. C. Robertson, Live Stock Commissioner, dealing with the year 1925-26, states that Saskatchewan maintained her lead as the chief horse-producing and horse-using province in the Dominion. Saskatchewan has 1,177,539 head of horses; approximately 1,500,000 head of cattle; 131,359 sheep and 60,972 swine. Her live stock has an estimated value of \$135,112,000, and Saskatchewan live stock and live stock products for the year ended April 30, 1926, have an estimated value of over \$168,000,000.

Assailant Is Identified
The youth who attempted Mussolini's life at Bologna recently and who was killed by the crowd surrounding the premier, was identified as Anton Samboni, son of a Bologna printer.

China consumes more fireworks in a year than any other nation. They are used in connection with social, religious and military functions, as well as births and funerals and peace demonstrations after quarrels.

The principal ingredients of good luck are prudence and industry.

Says Magician's Secrets Known

Four Friends of Houdini Are Acquainted With Mysteries

Four friends of Houdini, the magician, who died recently, know the secret of his magic, Leonard Hicks, a hotel operator said after reading a report that Houdini died without revealing the secrets of his success.

Mr. Hicks claimed a lifelong friendship with the magician during part of which he said he was associated with Houdini in the theatrical profession, and said the others to whom the secrets are known are Houdini's brother or known on the stage as Theodore Hardson, Bud Collins, who was Houdini's assistant for 16 years, and James Vickery, who was his assistant for 14 years.

Work Fits League

The League of Nations, with its associate organizations, are world wide, and not European institutions, H. B. Butler, deputy head of the International Labor Office, told the Canadian Club at Ottawa. The league itself was a kind of fire brigade and naturally did not expend its efforts upon structures which were not in flames. Its work was where structures were smouldering and during the past seven years Europe had been the scene of most of its activities.

Relieves Catarrh Almost Instantly!

Nasal Catarrh Clogged Nostrils, Obstructs Breathing, Causes Headaches, Etc.

Nasal catarrh clogged nostrils, obstructs breathing, causes headaches, etc. A remedy is now available which relieves the condition almost instantly. It is a simple, safe, and effective treatment. It is a kind of magic. You breathe freely and easily as nature intended—and your old head feels clear and clean.

To prove that this is absolutely true and to quickly introduce the treatment to thousands of catarrh sufferers who need it—our druggists are now authorized to supply Georo Wormwood Balm on a strict guarantee of swift and full satisfaction or money back! No matter how many treatments you have used without success—if you really want to be freed from catarrh, don't miss this opportunity to try Georo Wormwood Balm with most efficient relief of costless pleasure with results. A 60c box will last for weeks.

Wealth In United States

The internal revenue bureau analysis of tax receipts for 1924 show that during that year seventy-five people in the United States had incomes of one million dollars or more, while three pleaded guilty to incomes of five millions. Presumably the latter three were John D. Rockefeller, Jr., and the two Fords, Henry and Edsel. New York State reported 20.05 per cent of the individual incomes of the country and paid 33.62 per cent of the income tax.

Million Dollar Paper Mill

A million dollar mill is to be erected on the Fraser property, immediately outside Aylmer, Que., presumably by the International Paper Company, states the Ottawa Journal.

The "good luck" chain letter has entered Japan from the West—and has been barred by police as a social nuisance harmful not only to the person but also to the post office.

Nurse's Advice

Rid Her Of Pimples

Brooklyn. Mrs. Minnie Penstere writes: "My pimples and black heads got so bad I feared it was eczema. I confided in a false friend of mine. I had been troubled with constipation and indigestion for some time. She advised me to try Carter's Little Liver Pills. You can see by my picture that the treatment has done wonders, and I am now free from constipation. Chronic constipation many times causes pimples. Carter's Little Liver Pills encourage the bowels to eliminate the poisons. Druggists. 25 & 75c red packages."

There was a slight difference of opinion. He acknowledged his mistake quite generously by saying: "You are right, and I am wrong, as you generally are." "So since of you to put it like that," she said, sweetly. But then she began to think about it.

Reducing by radio is becoming popular. One woman reported that 15 minutes exercise a day, directed by the expert for one of the large broadcast companies, cut her weight from 150 to 130 pounds.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and malnutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

Though angeliworms cannot distinguish angels they are not blind. They have light-sensitive organs distributed along the whole length of their bodies that perform the function of the normal eye.

After Shaving—Minard's Liniment.

Make it NEW for 15 cts!

"Better Never Late"

Wool Growers Would Profit by Making Early Shipments

During September 15,088 pounds of wool were received at the Western warehouse of the Canadian Co-operative Wool Growers' Limited, at Regina, and 14,534 lbs. at the warehouse at Portage la Prairie. The manager states that apparently shippers of wool figure "better late than never," but also expresses a hope that in time co-operative shippers will realize that "better never late" would mean money in the pockets of everyone shipping wool to the farmers' own organization.

Frenchman's Queer Hobby

A Frenchman in Rouen is said to follow the hobby of embroidering eggshells. From 600 to 2,000 tiny holes are made in each shell. One eggshell will take sometimes as long as two years to complete and costs \$1,000.

MOTHERS PRAISE

BABY'S OWN TABLETS

Mrs. L. M. Brown, Walton, N.S., says: "I cannot recommend Baby's Own Tablets too highly. I have found them invaluable for the ailments of little ones." Mrs. Brown's testimony is the name of a laxative—mild but thorough in action—which never fails to regulate the stomach and bowels; relieve constipation and indigestion; break up colds and simple fevers; and make the dreaded teething period easy. In fact you cannot banish all the minor ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Oil Strike

Another oil strike is reported—caught at a 3,811 foot depth in the Illinois-Alberta well a half mile west of Royalty No. 1. The flow of naphtha gas is estimated at between three and four million cubic feet a day with naphtha at the rate of about a hundred barrels a day.

B.C. Lumber Exports

Exports of lumber from British Columbia for the first half of 1926 established a record with 368,565,343 feet of lumber shipped out as compared with 263,911,823 feet in the corresponding period of last year—an increase of 45 per cent. Larger shipments to Japan and to the Atlantic seaboard swelled the total of exports this year.

A fire has been burning for 67 years in the Summit Hill coal mine in Pennsylvania. Engineers estimate that it has consumed 14,000,000 tons of coal. More than \$3,000,000 has been spent in fighting it.

Troubled with

Lame Back for Over 17 Years

Now feeling fine as a fiddle

Harry H. Buas of Egmont, B.C., suffered from a lame back for over 17 years. Every spring he was laid up from work. He tried many remedies, but could not obtain relief. He was advised to try Gin Pills and immediately obtained relief. Read his letter:

"There is nothing to compare with Gin Pills. I suffered unceasingly with a lame back for over 17 years. I tried almost everything, even to hot poultices. I could not sleep. After taking two and a half boxes of Gin Pills I am at work again. I feel fine. I am a fiddle. I will not be without Gin Pills from now on. I am telling everyone in the settlement who has kidney or back trouble to give Gin Pills a trial. Publish my letter as I would like others to know what great relief Gin Pills gave me."

Pains in the back, constant headaches, swollen joints, painful urination, murky urine, brick dust deposits, scanty or too frequent voiding of urine are all symptoms of kidney trouble. Relieve your suffering and ensure a future free from kidney ailments. Get a box of Gin Pills today. 60c at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada.

Sentiment vs. Economics

By C. W. Peterson

To those who see in the phenomenal prosperity of the United States and the magnetic attraction it has for the people of Canada, a tendency which might some day easily lead to a weakening of the ties that bind Canada to the British Empire, our present economic position is not entirely reassuring. Because history shows that in the course of time economic considerations will invariably prevail over patriotic sentiment. While we cannot hope to outstrip our powerful neighbor, we can come much nearer creating opportunities for our own people at home than we are doing at present and thus arresting the debilitating leak of our precious, vital asset and stifling the inferiority complex we have unconsciously created in our public mind, which cannot be without its important influence upon the individual decision leading to southbound migration.

It is useful to arrive at a clear appreciation of the general economic effect of an enlarged agriculture. The average person readily gives intellectual assent to the time-worn phrase that agriculture is the "backbone of the nation," but usually without positive conviction or any adequate conception of the fundamental facts of the case. It is generally a mere figure of speech. It is, therefore, well to consider briefly to what extent agriculture has been responsible for Canada's material progress. Forty-one per cent of our net production in the last census year was agricultural; thirty-three per cent manufacturing; our forests, mines, fisheries, construction etc., account for the remaining twenty-six per cent. Our 8 billions of agricultural capital represents 36 per cent of Canada's total available wealth. Urban real estate accounts for 26 per cent, our railway plants, 10 per cent; forests, 5 1/2 per cent; mines, 2 1/2 per cent, and manufacturing equipment, 2 1/2 per cent.

This gives a line on the paramount position of our agricultural industry and suggests that a policy having in view the colonization of Canada's vacant lands along vigorous lines, would speedily lead to increased prosperity in our urban centres and should interest all classes of Canadians irrespective of occupation. The Hon. Mr. Forke, Canada's new Minister of Immigration, has recently announced his intention of speeding up the work of his department overseas. It is hoped that his efforts will meet with every success. His department squarely faces Canada's key problem.

Nine Million Pounds Of Twine

Co-operative Supply Department of U.G.G. Transacts Large Volume of Business

Nearly nine million pounds of binder twine were handled by United Grain Growers for the harvesting of the 1926 crop. This makes a total of over forty million pounds of twine handled by the company during the past five years, and of over eighty-five million pounds of twine since the company first went into the twine business. Before 1914, when the company, the Grain Growers' Grain Company first undertook the distribution of binder twine it was impossible for a farmers' organization to buy twine at wholesale prices, and the company in spite of its large purchasing power, had a good deal of difficulty in making purchases at first. For a time it was necessary to import twine made in Ireland. Before that time twine was handled only through certain well defined retail channels, and the retail profits allowed added from two to four cents a pound to the cost of twine. Now, thanks to the work done by the farmer's company, a large part of the twine used is distributed through farmer organizations, at U.G.G. elevators and by local associations. The total savings to farmers that have resulted are not easy to calculate, but probably two million dollars less has been paid by farmers for U.G.G. twine than they would have had to pay under conditions formerly prevailing, and still prevailing to a certain extent in parts of the country where there is no competition from farmer organizations in the handling of twine. But that is only a part of the saving to farmers, because this competition has brought about a lower scale of prices on twine all over the country, resulting in savings of many millions.

More than two million dollars' worth of farm supplies are handled each year by United Grain Growers. Besides binder twine one of the largest items is flour and feed, of which last year 5,650 tons were sold, nearly all at elevators equipped with flour sheds. The value of this was \$308,433, and during the past five years flour and feed to the value of over \$1,580,000 have been distributed. The coal business of the company amounts to over half a million dollars each year, more than two thousand carloads being handled. While most of this goes through elevator coal sheds, a good deal is sold through local associations, which before the company entered the field were unable to buy coal at wholesale prices.

The French Academy has decided to admit the word *manicure* into the French language. The word, though in general use, in that form, has not hitherto reached dictionary rank. The word *manicure* is to come up for discussion soon.

The 600 songs of Schubert were written sometimes ten in a day in the fourteen years between the time he was 17 and his tragic death at 31.

A complaint always passes for more than its face value.

There are many ointments but **ONLY ONE** **Zam-Buk** THE GREAT HERBAL SKIN BALM

Every Woman Deserves One
The SMP Roaster is a first time saver. You put the roast or fowl in the oven. The roaster does the rest, bastes, roasts to perfection. It roasts with very little shrinkage, thus saving dollars every year. None of the tasty meat juices are lost; all the rich flavor is retained. Besides you can buy cheaper cuts, for it makes cheap cuts taste like choice ones.
The close fitting cover keeps all the cooking juices and the grease inside the roaster—the smell of cooking doesn't fill the house, and the oven is kept sweet and clean. Best of all, it cleans out in a jiffy after the roasting. These are splendid virtues. Price \$3.50 to \$5.50 according to size and finish. Sold in all hardware stores.
SMP Enamelled ROASTER

Airplanes Sow Rice Seed
Modern Science Aids Nature in Northern Manitoba
Sowing by airplane has been inaugurated by the Manitoba Department of Agriculture. Recently sacks of wild rice were forwarded to Cormorant Lake station on the Hudson Bay Railway, for distribution by plane over suitable marshes in the Manitoba northland. This includes a vast duck marsh known as Moose Lake and Cedar Lake, said to be the largest duck marsh on the North American continent.
During an extensive survey of the north last year, Prof. V. W. Jackson, of the Manitoba Agricultural College, found no wild rice north of latitude 53, and to this he attributes the fact that ducks are coming south in the rice season.
Finding no reason why wild rice should not grow in the north, the suggestion was made that modern science be brought to the assistance of nature. Despatch of the airplane to sow the seed was the result.
Expectations are that, should the rice develop, the natural spread of food supply will increase the number of ducks and muskrats.

Observe Ancient Custom

Remote Districts of Turkey Still Have Death Crier

In remote districts of Turkey, quaint customs still linger despite Angora's vigilant modernizing arm.
One of the strangest is in the distant village of Cesare, whenever a death occurs, a public crier shouts the news through the streets. Even though the death occurs in the depths of the night, the crier immediately shouts out the doleful tidings and wakes all the living villagers with his cries.

The post of Public Death Crier was established many years ago by the Evkafat, an official organization controlling religious affairs, which still continues to pay the crier a regular salary for the performance of his grimly duty.

Greyhounds are supposed to be the oldest breed of dogs in the world. They have been traced back for thousands of years. Their figures are found on Egyptian frescoes, and history relates that they were used for coursing by Xenophon.

IOWALTA NEWS

The Iowa Needlecraft met at the home of Mrs. Robert Kinley on Thursday and a good crowd were out regardless of weather. Mrs. Kinley served a delicious dinner after the business of the club was dispensed. They adjourned to meet with Mrs. A. Friszel in January, there being no December meeting.

The Iowa Christmas Tree program will be held at the school on December 23. Miss Rose being in charge. We hope that more people are in attendance than last time.

Several people from Iowa attended the Moosebrook chicken supper on Friday last. The supper was one of the best, and auctioning of the basar went fine. We hope that next year will see a continuation of these fine suppers.

The chicken supper and basar was well attended from town and neighboring districts, on Nov. 18 at the home of Mrs. Barr. The ladies realized over \$100.00 from the proceeds.

Neil Rutledge spent a few days in Canada attending to business and visiting friends.

The young folks of Iowa pleasantly surprised Opal Rowland on the evening of Nov. 24. Opal is leaving this district for Medicine Hat where she intends to make her home. They presented her with a beautiful fountain pen as a remembrance.

Many of the young people intend to take in the pie social at Wotville.

FOR SALE

About 30 bushels. Garnet Wheat, hand picked in the field, \$2.75 per bu., 2 good Duroc Brood sows; 2 first class milk cows; 1 good McLaughlin top buggy. Apply S. W. Marshall Phone 2706, Lacombe. Must be sold by Dec. 15, as I am leaving for the U.S.

V. H. R. BURROWS

Direct From Factory To You 'Tis a Long Road With Many Tolls

Of all ghastly frauds that have cost the Canadian public hundreds of thousands of hard earned dollars one of the greatest is the cry, "Direct From Factory to Consumer."

Direct! How Direct?

Direct to a provincial manager who takes a toll sufficient to pay any warehousing costs he may have to incur—sufficient to pay the office rent, help and the cost of building a field force of salesmen.

Direct from the manager to the District Managers who take their toll—sufficient to cover expenses and leave a profit.

Direct from the District Manager to the Bell Ringer whose profit is usually the amount of the deposit fee required.

Truly the route direct from the factory to you is a long road of many tolls.

Are profits big in the Peddler Field? Just secure a copy of the "Specialty Salesmen" Magazine and see what these peddler firms say themselves.

Are costs high in the Peddler Field? A well known shoe firm in Montreal tried selling its shoes by canvassing and found that peddler selling was far more costly than selling from their stores in the regular way.

The bare, bald, plain truth is that all the Peddler's talk about saving you money is sheer bunk. His costs run so high that the ordinary firm would go broke from just one item that the peddler's firm meets among many other high costs. We refer to the cost of hiring and training its sales force, which authorities say, will cost from 100 p.c. to 150 p.c. higher than the same item does in

the regular channels of distribution. Yes—it's safer to spend your money at home.

There is a word often used by economists. That word is "utility."

When you buy merchandise you pay for three utilities. You pay for form utility—time utility and place utility.

Form Utility is given by the manufacturer who takes raw goods and puts them into the form and condition—contrives from them the article that you can use.

Time Utility is given by the wholesaler who pays for transporting that article to the general district where such goods are needed and then stores it until such time as his retail customers have a demand for it.

Place Utility is given by the retailer who anticipates your wants by having it here at hand so that instead of travelling long distances to secure this article you have it right at hand without the expense of delay or trouble on your part.

These utilities are eternal. Not one of them can be dispensed with and they must be paid for. The only difference is that the Peddler handling a specialty must charge you more for delivering these three utilities than the old established chain of manufacturer, wholesaler and retailer has to charge.

That is due to the Peddler handling one specialty where the cost must fall heavier than where the cost is apportioned over a mass of merchandise of many different lines. Moreover the Peddler is not equipped to deliver these utilities at a minimum cost.

MORNINGSIDE

The chicken supper of the United Church Morningside last Thursday, was a decided success. A fine class musical programme was furnished by the Union Church choir, Ponoka, under the able management of Mr. Bowker, and was made up of solos, anthems and chorus. Mrs. Dower and Mr. Bowker contributed two excellent

recitations, and received hearty encores. Rev. J. B. Francis occupied the chair in his usual pleasant manner. Mr. Williams of the hospital staff presided at the organ. Proceeds amounted to \$43.00.

Mr. and Mrs. K. McDougall have moved into Morningside and are now settled in the house which they have purchased from Mrs. Johnston. Mr.

McDougall has not been in good health for some time and we trust that his long earned rest will restore to him his health. We welcome them to our town.

WISHART-WOODALL

The home of Mr. and Mrs. Woodall, Bowden, was the scene of an interesting event on Saturday, November 20, when Aulita Maude their eldest daughter

was united in marriage to Mr. Roy David Wishart, son of Mrs. M. E. Wishart of Calgary. The ceremony was performed by Rev. Henry Young, M.A., of the United Church, Bowden. At three o'clock to the strains of the wedding march played by Miss Depencier, the bride dressed in a handsome gown of peach georgette with silver trimmings and carrying a large bouquet of roses and maiden hair fern entered the room on the arm of her father. The ceremony was performed under an arch of flowers in the presence of only immediate relatives. Miss Edna Woodall, sister of the bride and dressed in orchid canton crepe, with rosebud trimmings acted as bridesmaid, while David Laird of Innisfail acted as best man.

Mrs. Young sang "My Prayer" during the signing of the register, and after the congratulations had been extended to the happy couple, a dainty luncheon was served. Mr. and Mrs. Wishart left on the evening train for Morningside, where they now reside.

We are sorry to report that Harrison Bowie, is ill in the Lacombe Hospital. His many friends will regret

to hear of this, and will be glad to see him restored to health once more.

Advices to O. Boode and Sons, report that the car sales in Vancouver, from returns from all distributors, show that Chrysler led the field. Mr. Boode reports business good, many sales, and a better outlook than ever for Chrysler in this territory.
